

Introduction

{Win Mobile version}

Who is the winner?

Just ask to **MatchVerify**. Look *Stage by Stage* your classification in your Squad or even in the competition at any time.

Know the Match result just after the last shoot, you need only to register the principal shooter's factors from the official verify list.

The **MatchVerify** can even calculate your local club weekend's math, no more wasting time to make score sheets and waiting for the results.

You can store up to 20 shooters in a maximum of 40 stages match, and this program have a very friendly user interface.

Installation.

See the file ReadMeFirst.txt in DloadMatMobile.zip.

<SETUP>

Press <MxStages> and will be presented a field to enter the total stages in the match.

Press <Stage Points> and the Stage List will be presented.

Touch a stage line for edit the stage points.

Attention, change the stage points after any score sheet have been entered for one stage, can result in Stage / Match result discrepancy.

Press <Shooter> and the Shooter List will be presented.

Press <New Shooter> to include or touch the shooter line for edit.

Press <Clear> to erase the data files:

Stage MxPoints, Shooters List, Score sheets.

A confirmation will be requested.

<Scoring>

Select a shooter from the list.

Select a Stage from the list.

Press the button "A", "C", ... "NS" to increment this punctuation by one (this is usefull when you score the targets one by one in your club match), or select the field at right of the button and use the on-screen keyboard. The "complete" button will complete the missing rounds with "A"´s. After register the time, press the <Done> button and the stage info will be presented for verification.

<VERIFY>

Show the calculated factors for the shooter and let you enter new factors directly from the official verify list, this function permits you easily capture others shooters results and confirm your own factors. To edit a factor, just touch the line.

<Results>

You can see the results by stage or match, in this case You must have the 'MxPnt' for all the stages registered. The precision is + 0.01% if you compare with the "MSS" results.

For stage, select a stage from the list.

For match, use thr <Match Overall> button. This result can only be comparable with the competition official result if you enter the factor of the first place for each stage. You may search for the winner of each stage in the official verify list.
